

Please do not take away something as basic as the right to choose where we get our information from. Should we decided that we are willing to pay money not to hear commercials, and, from a legally licensed source such as XM (and even Sirius) so be it.

I can choose to get my traffic and weather from any number of sources now such as TV, Radio, Newspaper and Internet - why shouldn't XM be allowed to provide the same?

Thank you,

Kurt Liestenfeltz
